

```
#include <iostream>

using namespace std;

int main()
{
    int book[5];
    int searchID;
    cout << "Enter 5 Book IDs:\n";
    for (int i = 0; i < 5; i++)
    {
        cin >> book[i];
    }
    cout << "\nEnter Book ID to search: ";
    cin >> searchID;
    for (int i = 0; i < 5; i++)
    {
        if (book[i] == searchID)
        {
            cout << "Book Found!";    return 0;
        }
    }
    cout << "Book Not Found!";
    return 0;
}
```
